

LIGHTING APPLICATION ENGINEER

Energy Efficient Lighting Products

Do You Want:

- A, challenging newly created position where your leadership in making people and processes more efficient will make a difference?
- A growth oriented position in a rapidly growing company, where your advancement will directly correlate to your abilities and achievements?
- Direct reporting to our Vice President?
- An exciting, high energy organization with a well founded reputation for innovation, excellence and exceptional customer service

Our fast growing, profitable company has been an innovative manufacturer of energy efficient lighting products since its inception in 1992. We are looking for a lighting application engineer with a strong background in commercial and industrial lighting design, who has the leadership and people skills to support our sales and service hub efforts. This position will appeal to a motivated, problem solver who wants to make a difference and grow working for an entrepreneurial company that is committed to growth and quality.

We Offer:

- An interesting position where you will have responsibility for supporting our sales force and service hub to develop new customer efficiency projects providing quality design documentation necessary to satisfy customer's program requirements. This will include providing point by point photometric calculations using AGI32 as well as detailed AutoCAD based lighting layouts making sure that all projects are designed with the right balance between operating costs (i.e. energy and maintenance), initial cost, and customer light level and payback requirements.
- A position where your hard work and efficiency will be recognized and appreciated and you have the opportunity to take your career to the limit of your abilities
- Direct reporting to our Vice President who is highly motivated, demanding but fair and will give you the support you need to be successful.
- A high energy environment with a small company feel and a core team that is committed to continued rapid growth
- A parent company that is solid financially and growing rapidly
- A company that understands the need for balance between family and business
- A generous base salary and a benefits package including low cost family medical, dental and vision, holidays and vacation time, 401(k) and continuing education

We require:

- A. A person who aligns with our vision, mission and values. Key values we subscribe to include honesty, loyalty, open, straight forward communications, being results oriented, having a strong work ethic and a willingness to do whatever it takes to serve the client. You will be expected to put in the time necessary to ensure the job is done right so that our customers receive best in class service and support.
- B. The ideal candidate will have a bachelor's degree with at least 3 or more years of lighting application, design and layout experience. We require a talented individual with extensive experience with the most current release of AutoCAD & AGI32. Experience performing energy calculations is desirable. Lighting retrofit background would be a major plus. You must have good communication skills.
- C. A driven leader who understands priorities and knows how to motivate people. An efficient problem solver who thrives on multi-tasking and working at a fast pace and isn't afraid to make mistakes (but never the same one twice). Someone who loves learning new things and is good at teaching others. A person who understands the need for quality design and its impact to an energy efficiency project. Someone who understands how to get a job done on schedule and within budget, has the flexibility to change directions rapidly with the response time to make sure client commitments are kept, and will do whatever it takes to satisfy the customer.

If you have been looking for a position where you can expand your knowledge of lighting applications and can grow your career while working for a rapidly growing company, please contact us at:
